Corporate Capability Statement

Company

Roman Stone Construction is a precast concrete manufacturer that was incorporated in New York in 1903 and has operated continuously for over 118 years. We have attained certification as an approved supplier for Con Edison, NYSDOT, Nassau County DPW, Suffolk County DPW, Port Authority NY/NJ, MTA NYC DCAS and many other government and quasi-government agencies in the Long Island/NYC Metro area. Our 9-acre manufacturing plant located just 30 miles from midtown Manhattan gives us an edge in competitive pricing and delivery of precast items in the NYC metro area. Our workforce is unionized and we are adjoined with Local 731, Local 138 and Local 282 and the Long Island Contractors Association.

Capabilities

Our 33,000 square foot indoor manufacturing facility is located on Long Island. We have two 1 cubic meter concrete mixers with automated controls, which are approved by NYSDOT for manufacturing concrete. Our quality control program has been certified by the National Precast Concrete Association and we have been a top level NPCA plant for over 20 years. We can provide concrete mattresses, large electrical vaults, precast barrier, precast concrete pavement slabs and custom concrete products.

Key Products

Electrical Vaults, Transformer Vaults, Concrete Conduit, Concrete Mattresses for Scour Protection, Manholes, Handholes, Cast Iron Frame & Covers, Drainage Structures, Precast Pavement Slabs (PCPS)
