FOR IMMEDIATE RELEASE

Local Company Earns Industry Recognition

INDIANAPOLIS – **Roman Stone Construction Company** of Bay Shore, NY has been honored for 15 consecutive years in the National Precast Concrete Association’s plant certification program. The company was recognized for this achievement on Feb. 22 in Denver during The Precast Show 2018.

Roman Stone has been continuously operating in the State of New York for over 115 years. The original manufacturing facility was located in Brooklyn and the Company moved to Suffolk County, Long Island in 1962. Roman Stone manufactures precast concrete products for municipal purposes, specializing in concrete utility vaults and pullboxes, precast pavement slabs, highway barrier, concrete conduit, light pole foundations, custom precast items, and our newest product line - Norweco advanced nitrogen reducing septic systems for both residential and commercial customers.

NPCA certified plants that have been continuously certified for 5, 10, 15, 20 and 25 years are honored for their long-term commitment to practicing quality production practices and producing high-quality precast concrete products. To achieve certification, precast manufacturing plants are graded on several critical areas of precast concrete production including quality control procedures, safety, production practices, concrete mixture, reinforcement design and more.

“NPCA is proud to recognize Roman Stone Construction Company for its dedication to the program and to manufacturing quality precast concrete products,” said Ty Gable, president of National Precast Concrete Association.
